

Recommended Style for 4 and 5 Foot Fences in The Forest

General Guidelines

- All wood must be pressure treated.**
- Keep fence at least 6 inches from property lines.**
- Do not place in buffer areas (typical).**
- Placement may be in backyard and back half of side yards.**

Posts: 4"X4" lumber.

- Set in concrete in 8" diameter holes, 2 feet deep.**
- Distance between posts must be 8 feet or less.**
- Top post with ornamental caps (or use extended posts with notched/beveled ends).**

Rails: 2"X4" lumber, minimum.

- Run approximately parallel to ground.**
- Keep the pitch the same on adjacent sections, where possible.**
- Fit rails between ["exposed"] posts or fasten to the backside of posts.**

Slats: 1"X4" lumber (typical).

- Space one and one-half inches apart or less (typical).**

Finish: Leave natural (typical).

- Stain or paint may be permitted but must be pre-approved.**
